“Classes for Beginners”

These exciting **HARMONY ROAD** music courses bring students to the world of music through a tested, highly motivating program specifically designed to meet and develop the learning potential of each specific age group. Research has shown that even very young children can develop an awareness of pitch and musical concepts. If left untapped, this natural feeling for music may never be developed.

It is our goal to provide step-by-step musical training, which will aid in the growth of a child's inner music and enhance all future musical activities. Our instruction specializes in helping students focus on listening, singing, keyboard, and creative skills.
